SKILLS

- C | C++ | Java | Python | JavaScript | HTML | CSS
- Git | React | OOP | Visual Studio Code | IntelliJ Idea
- Windows | Mac OS | Linux Ubuntu | Frontend | Backend | English, Japanese, Korean

PROJECT EXPERIENCE

To-Do List | [HTML](#), [CSS](#), [JavaScript](#), [React](#)

Dec 2023 - Jan 2024

- A to-do list app that enables users to add tasks or mark them as completed. Additionally, tasks are organized according to their status.
- The UI/UX is designed to be user-friendly; an input bar allows users to enter tasks, and tasks can be easily visualized with three types of status buttons.
- Tasks that have been completed previously can be used again by clearing the checkmark on the tasks.

Budget Tracker | [HTML](#), [CSS](#), [JavaScript](#) (Front-end / Back-end Developer)

Sep 2023 - Dec 2023

- Course: CMPT 276 Introduction to Software Engineering, SFU
- Coordinated tasks among team members unfamiliar with GitHub, ensuring efficient workflow and team collaboration, leading to the timely and successful completion of the project.
- Designed and implemented the front-end side of a budget tracker app, focusing on user-friendly UI design, incorporating a versatile dark mode, and creating intuitive graphics for data visualization.
- Developed the back-end side for a budget tracker, implementing algorithms to calculate weekly, monthly, and semester averages, and designed a feature to suggest potential savings or spending reductions based on predefined thresholds.

EDUCATION

Simon Fraser University - BSc. Computer Science

May 2023 - August 2026(expected)

Langara College - Associate of Computer Science

Sep 2020 - Apr 2023
